NEWS BUDGET FROM HUSSAR AND DISTRICT

Newspaper Notes From Hussar—Council
Curling and Skating Rink

HUSSAR, Sept. 11.—Miss Larson, who is teaching at the "Makepeace" school, was a visitor in Hussar over the weekend.

Mrs. Chas. Merriam and daughter motored to Bassano on Saturday.

Mr. and Mrs. Jesse Walters and family moved into their house left vacant when Mrs. T. Bettey moved to Calgary the first of the week. They have been living in Makepeace.

Little Shirley Reesor, after driving collar on Saturday afternoon, striking her head upon a stone. She was quite badly hurt, but is getting on as well as can be expected.

Mr. and Mrs. A. A. Cliffland motored to Calgary on Sunday to take Wm. Vandermore in. He will remain in the Kells Stationer. Mr. and Mrs. Cliffland returned the first of the week.

The Misses Evelyn Cliffland and Anale Robinson motored to Lethbridge on Friday, and on to Calgary for the week-end.

Chas. Stickle motored to Okotoks Sunday.

Lee Phillips has started running the Macdonald Transfer, beginning on Friday.

A number of people motored out from Hussar to attend the dance given at the Fairview school on Saturday. Among those present were: The Misses Frances Larson, Olive Barvier, Marjorie Jane, Elsie Keddle, Vivian Curtis, Edna MacDonald, Mrs. Middleton, Messrs. Leo Phillips, Edm. Crawford, M. A. Mahoney, Bill Watt, Jason Bell.

Mrs. Middleton, Miss Sowie and Alf Middleton motored down from Calgary on Saturday to spend the week-end at Mrs. MacDonald's.

The W. I. Girls' Club play is under way, and will be presented at the Community Hall in October. A dance will follow the play.

Mrs. E. J. Bell and Miss Margaret were Bassano visitors on Saturday. Anson Mary, of the auditor's department, Michigan Central, with his wife, was visiting at Willow Grove Farm last week.

Mrs. Snodgrass, Miss Virginia, and Mr. Graves, from Missouri, drove over to Calgary and Turner Valley on Tuesday. While at the oil fields they visited "Gill's Half Acre" and report it as worth seeing. About 30 trees from where the flames shoot the pipes are white with frost.

Misses Jessie Elliott and Virginia Reddings, and Messrs. Graves and Crawford motored to Brooks on Monday.

Rev. H. E. Gordon preached a most helpful sermon on the topic, "Your Divinity," at the hall on Sunday evening. The topic for next Sunday's sermon is "The Glorious Criminal." It is gratifying to have the congregation increasing in numbers again, now that vacation is over.

Regular Sunday school started again on Sunday. Several of the old teachers were in their places, and it is hoped that teachers and pupils will

Rosemary News

ROSEMARY, Sept. 11.—W. L. Stucky returned from Turner Valley last Thursday to spend several days with his family.

Shorty Kellow is at present working for W. Parks.

C. C. Narm has gone to work for P. Williamson in Glen.

Miss Faye Robinson was a Brooks visitor last Saturday.

Mrs. Fred Pickett and children, of Arrowwood as at present staying with Mrs. Pickett's mother, Mrs. C. C. Narm. They had the misfortune of losing their house and contents by fire.

Mr. and Mrs. J. Hall enjoyed the company of Mr. and Mrs. C. L. Norton on Sunday.

Inspector Boyce passed through the Colony last week.

Mr. and Mrs. Laganere enjoyed a visit with Mrs. Laganere's niece and husband, from the east.

all to back this coming Sunday.

Council Meeting
The regular meeting of the Hussar Council was held on Friday evening. Revere Cliffland and Councilors Bell and Holland were present. In addition to the routine work, an effort was made to purchase two acres of land, the south east corner of northwest quarter of Sec. 24-25, from A. L. Williams, for use as a cemetery. This is situated about a mile northwest of the village.

As the council feel that it is of the utmost importance that adequate fire protection be provided for Hussar, they decided to have the well on near Avenue put into working order, and to dig a water main to it, and one near Cliffland's well, and also one near the school well, as soon as the funds become available. Undoubtedly one of these cisterns will be built this fall. It was also decided to have the reeve and the secretary, and the other councillors, if possible, inspect fire pumps with the intention of purchasing one for the village.

T. A. Hawshaw, on behalf of the curling club, presented a request to lease land on the stampede grounds for the curling and skating rink. The council granted permission to use the land north of the fence and east of the road to the race track, and as close to the village as possible the title to the stampede grounds, they will lease the land to the curling club.

To build Curling Rink
The exact location of the curling and skating rink was decided upon the first of the week, and preparations are being made to have the grounds levelled off and prepared for use this winter. W. J. Hoagland will have charge of the preparation of the grounds. They plan to build a cistern near the rink for the water supply to flood the rink.

BASSANO HIGH SCHOOL

School is now in full swing and 44 are the basketball team, the Veterans, beating the New Comers, to two out of three ball games, 8-7 and 31-10.

The Literary Society has been organized, the officers for 1929-30 being: Pres.—Perry Johnson

Vice Pres.—Katherine Hunter, Sec. Treas.—Dunnie Powell, Chairman of Committee—Jean Plummer.

Editor of Paper—Art Thompson. Meetings every Thursday from 8 to 8:30. Friends and parents are invited to attend.

Death Claims Well

Known Farmer

Clarence Mason Fisher Died on Saturday, September 7th

The community of Bassano was saddened last week-end by the death of Clarence Mason Fisher, who passed away in the Bassano Hospital early Saturday afternoon, Sept. 7th, at the age of 45 years.

Mr. Fisher had been ailing for the past year from abdominal trouble. The sickness had so weakened his system that he was unable to recover from the operation which was performed a few days before his death.

The funeral service was conducted by Rev. P. C. McCrean in Knox Presbyterian Church on Monday afternoon, Sept. 9th, at 2:00 o'clock, and a large number of people attended to pay their last respects to a departed friend.

Clarence Fisher was one of the old time farmers of the Bassano district, coming here with his wife and son in the spring of 1915, from Blairburg, Iowa. He had a very large circle of friends who deeply regret the loss of a good citizen and a dear friend.

Deceased is survived by his widow, one son, Ray, a brother at South City, Iowa, and a sister, Mrs. Hilmer, of South Park, Iowa.

Countess News

COUNTRESS, Sept. 12.—Mrs. M. Ferguson spent Thursday with Mrs. Lane in Lethbridge.

The Countess store recently received a new lot of paint.

Frank Chamberlain and sons Paul and Robert, of Glen, were guests at the Gamble home on Sunday.

Miss Price, Mrs. M. Ferguson and little daughter, Marianne, were dinner guests at the Blue home Sunday.

Mr. and Mrs. Royal Burrows and family were visitors in Glen Sunday with Mrs. Royer.

E. H. H. is planning to visit his mother in California this fall. Mrs. M. Gamble and Mrs. Slaus were callers at the Ralph Burrows home Tuesday evening.

Mr. and Mrs. G. G. Ferguson were among the Countesses who attended the dance in Lethbridge last Friday evening.

Scales Are Now In Good Order

A short time ago the public platform scales which were in charge of the local Board of Trade, were not weighing accurately. The trouble, which caused some inconvenience to farmers, was recently remedied, and the board announced that the scales are now in good working order again.

To Vote On \$500 Payment For Irrigation

The sum of \$1,000 Still Owing on Town Irrigation System

At an additional sum of \$500 to be paid on the debt incurred in the building of the town irrigation system will take place at the next regular meeting of the Board of Trade.

A notice to this effect was given at the last Board of Trade meeting, Wednesday, Sept. 11th. The board will vote on the \$1,000 on the irrigation system, and if the motion to pay \$500 is passed at the next meeting, as it most probably will, the debt will be reduced to a figure which can likely be paid off in full next year.

About twenty-two were present at the meeting last Wednesday, with President Wm. McLaughlin occupying the chair.

The president announced that A. T. Connolly, E. P. Currie, and H. G. Bredin had been appointed a party to examine the irrigation system.

In reporting for the public affairs committee, Chas. Hagger said that the scales had been put in working order, and he also stated that a number of arrow-shaped road signs were being obtained from the motor association, and these would be placed at suitable points on the roads.

W. J. Blankenship reported for the entertainment committee, and stated that more suitable arrangements were being made concerning the annual dance.

Plummer, Alberts, Wheat Pool director, will give an address at the next board meeting on the subject, "Co-operative Wheat Marketing."

WHEAT POOL PERMITS RESUMPTION OF HARVEST OPERATIONS

Harvesting of the wheat crop in the Bassano district would have been completed by this date but for showery weather which interrupted operations several times during the past two weeks. The rainfall was light, but it was sufficient to call a halt on combining.

The combine men now going south and in a few days more all the wheat will be cut.

"Alabaster," Arab stallion, belonging to the Prince of Wales, was with "Crusader," a Canadian Pacific steam locomotive, and went to the Toronto Exhibition as a break in their long journey across Canada to the Prince's ranch at High River, Alberta.

Mr. and Mrs. G. G. Ferguson were among the Countesses who attended the dance in Lethbridge last Friday evening.

The Countess store recently received a new lot of paint.

Frank Chamberlain and sons Paul and Robert, of Glen, were guests at the Gamble home on Sunday.

Miss Price, Mrs. M. Ferguson and little daughter, Marianne, were dinner guests at the Blue home Sunday.

Mr. and Mrs. Royal Burrows and family were visitors in Glen Sunday with Mrs. Royer.

E. H. H. is planning to visit his mother in California this fall. Mrs. M. Gamble and Mrs. Slaus were callers at the Ralph Burrows home Tuesday evening.

Mr. and Mrs. G. G. Ferguson were among the Countesses who attended the dance in Lethbridge last Friday evening.

Mr. and Mrs. Royal Burrows and family were visitors in Glen Sunday with Mrs. Royer.

C.P.R. To Speed Up Passenger Service

Yen Hours Will be Clipped Off Bus From Montreal to Vancouver

Starting on Sunday, September 15th, the Canadian Pacific Railway Co. will operate their Nos. 1, 2, 3, and 4 passenger trains on a new schedule which will reduce the run between Montreal and Vancouver by about ten hours.

The westbound No. 1 train, which now takes 36 hours to make the run, will be changed to about 4:00 p.m. Westbound No. 3 train, now running shortly after 1:00 o'clock noon, will be changed to about 4:00 p.m. The eastbound passenger trains, Nos. 2 and 4, will, on the new schedule, pass through Bassano about 15 minutes earlier than they do at present.

The new time table has not yet been issued, but when the figures are available the time and arrival of trains on the new schedule will be published in The Mail.

The reduction in ten hours of the run between Montreal and Vancouver will be obtained by speeding up the trains, and by reducing the length of time the train stops at certain points. At Winnipeg, for instance, these trains make long stops of an hour and a half to four hours. This will be reduced to forty-five minutes.

Plumer Will Talk On Wheat Marketing

Wheat Pool Director Will Address Board of Trade at Next Meeting

Ben S. Plumer, Bassano farmer and a director of the Alberta Wheat Pool, will address the Board of Trade at their next meeting, which will be Wednesday, Sept. 18th. The meeting will be held in the Hotel Windsor at 8:00 o'clock at the usual hour of o'clock noon, and will be preceded by the regular luncheon.

Mr. Plumer's address will be on "Co-operative Marketing of Wheat," which is of such vital interest to the grain grower of western Canada.

The Board of Trade wishes to extend to all farmers of the district an invitation to attend this meeting. The luncheon is at 1:00 o'clock, and the address at 1:30. All members and non-members of the board are invited to attend.

The secretary, C. McMillan, at the Canadian Bank of Commerce building, will be in charge of the meeting. The price of luncheon is 10c.

Preparations are rapidly going on for the holding of the town school fair on Thursday, Sept. 26th. It is the first school fair in Glen, and parents and children are showing a keen interest in the work.

Mr. Berger, new school principal at Glen, is in charge of the work. He has had a very limited time in which to organize the fair and to arrange the many details in holding an event of this kind, but he has accomplished a great deal in the time at his disposal. The town school fair gives promise of being a most interesting and popular one.

The exhibit shown will be of great variety, there being classes in grain, produce, sewing, cooking, art, live stock, writing, composition and other branches of school work. There has not been sufficient time to print and distribute prizes, but a complete list of prizes has been given on page 7 of this issue of The Mail.

In addition to the display of exhibits a program of sports will be run off consisting of jumping, race for the boys and girls, etc.

There will also be a free movie picture show for the children, which will be given under the auspices of the University of Alberta.

NEW LIQUOR STORE

The store vacated by McKee's men's wear is soon to be remodelled for the use of the Alberta Government venders.

The building was recently purchased about a month ago by the Alberta Department of Public Works.

Gem News

GEM, Sept. 11.—Mr. and Mrs. Jap Fryberger and family are enjoying a visit with relatives and friends in Saskatchewan.

Mrs. Roy Henson, of Hussar, was present on Mrs. T. Bettey's home on Tuesday evening. Miss "Vain" was a welcome visitor to Mr. Henson's.

Bill Henson, government road foreman, and his outfit passed through the Colony on Tuesday. He was on his way to control where he will have charge of the grading of the Hutton hill and other work in the district.

Hunters

Was Victim Of Glacier

Body Of Austrian Recovered After Eighty-Three Years

Eighty-three years ago, Norbert Maltersberger, at the time 23 years old, husband of Magda, and father of Franz Otto, failed to return to his cottage in the village of Kals, Austria, one day from the woods where he won his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Maltersberger came home just as he left that day in 1846. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Franz Maltersberger is now 86. His father was buried at Kals, while grandchildren and great-grandchildren mourned at his grave.

WHAT OUR GIRLS NEED

When Languid, Anæmic and Feeling Run Down

When a girl gives languid, dull and irritable when her color fades and she becomes pale, you may be sure that the cause is anæmia, or impoverished blood. The bright red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry oxygen to the tissues of the body. When a girl's blood is deficient in these red corpuscles, her body is under-nourished her nerves starved and there is serious danger of a decline. What is needed is an improvement in the quality of the blood.

It is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anæmia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases like this, Mr. John Philip, of Houston station, P.E.I., writes: "I can find no other opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run-down condition, very pale, nervous and much under weight. We tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after taking a few boxes she had gained weight, her appetite improved and she had a better color in her cheeks. In fact she had fully regained her former good health. I would advise every mother of 'wasting girls' to give them Dr. Williams' Pink Pills at the first sign of an anæmic condition."

Dr. Williams' Pink Pills are sold by every medicine dealer or by mail at 50c. A box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Car For King George

Has Six Wheels and Will Travel Over Roughest Roads

A six-wheeled motor car built to go anywhere on land has been delivered to the King at Sandringham, Norfolk. It is an all-British production designed to travel over the roughest mud and broken ground and even over ploughed land, while it can travel at 60 miles an hour on open roads. It has a remarkably able rubber caterpillar tracks for really rough ground.

Worms in children, work havoc. These pests attack the tender lining of the intestines and if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the book variety that cling to and feed upon the interior surfaces. Miller's Worm Powder will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Prairie Fisheries

Prairie Lakes Important Sources of Commercial Fish

The prairies of Canada are usually associated with wheat and cattle, but it is not so generally known that they are also important sources of commercial fish. Except for Lake Superior and Huron, the largest lake in America is in Manitoba, and great bodies of fresh water in Manitoba, Saskatchewan and Alberta teem with fish of the highest quality. In one day recently 40 carloads of rainbow trout and pickerel were shipped from these provinces to Minneapolis, Chicago and New York.

The Canadian post office carries 600,000,000 letters, 350,000,000 newspapers, and 400,000,000 parcels a year.

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

The proposed canal across Nicaragua, to link the Atlantic and Pacific, would be bigger than the Panama Canal.

Use MAGIC BAKING POWDER

World's Champion Egg Layer

Plymouth Rock Hen, Owned By Saskatchewan University, Sets New Mark

Beating the title-holder by an egg, or to be exact, six eggs, Lady Victoria, Barrell Plymouth Rock hen of the University of Saskatchewan, is chucking, proudly now—the champion egg-layer of the world.

Lady Victoria snatched the victor's crown from White Leghorn Hen No. 6, property of the University of British Columbia, when she laid her 358th egg, missing only seven days since she started her pullet year on September 3, 1928. She hasn't missed supplying a partner for a slice of bacon since January 1st. Lady Victoria's efforts have weighed between 28 and 50 grams, and a two-ounce egg is only a little more than 56 grams.

Youngest Master Mariner

Captain Douglas Kelly, Of Vancouver, Is Only Twenty

Captain Thomas Douglas Kelly, 24, of Vancouver, is probably one of the youngest master mariners in the world. And now that he has won his master's papers he is going to quit the quarter-deck and try his hand in the engine room for a while. "I want to see how things work in the most work-and-brains," says young Captain Kelly, "the captain's job or that of the chief engineer."

Captain Kelly won his master's papers at the age of 23 and was more than five years at sea in various capacities. Although the youthful navigator has spent most of his life in British Columbia, he was born in Liverpool. He joined the Royal Naval College at Exmouth, in 1916, remaining there until the college was disbanded two years later.

The Oil of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil has completely retained its position and increase its sphere of usefulness each year. Its sterling qualities have made it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

World Harvest Larger

Wheat Acreage in Many Countries Increased in Last Year

Present indications are that the world acreage of wheat to be harvested in the season 1929-30 will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five millions acres larger than in 1928. Areas reported in all European countries total 56,262,000 acres, an increase of 1.4 per cent. over last year.

The average life of an oil field is about three years.

Cramps Diarrhoea Pains in Stomach

Dr. Roy Lighthall, Milford, Ont., writes:—"I became very ill; lost my appetite and cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of De-Fowler's Extract of Strawberry and before I had taken half of it I was completely relieved, and I have had no symptoms again."

"I cannot praise 'The Extract' too highly. It has completely relieved me, and I have had no symptoms again."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's has been on the market for the past 34 years; does not disappoint when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. J. Milburn Co. Ltd., Toronto, Ont."

Wonderful Discovery Of German Experts

Treatment Given To Living Trees Makes Lumber Fairly Fireproof

A "tiny mineral soup," fed to living trees to make their wood partly fireproof after it has been cut and made into boards, has been invented by experts of the College of Forestry, at Tharandt, Germany. The process is a modification of one invented some time ago to dye the wood of a living tree to any desired colour. For this purpose solutions of the desired dyes were placed in holes bored in the tree close to the ground. As the sap rose to the wood with it, gradually colouring the wood, in the new fireproofing process, the dye solution is replaced by a bowl of the new "soup" containing compounds of silicon and fluorine and other chemical elements, so arranged that the solution flows little by little into a hole bored in the tree trunk. As with the dye solution, these chemicals are absorbed slowly by the tree and carried up by the rising sap into every fibre of the wood. The solution is too diluted to damage the living cells of the tree. Instead, its chemicals are gradually converted into mineral deposits throughout the wood, such as happens in the course of millions of years to wood buried in mineralized ground and slowly turned into stony fossil. To carry this mineralizing process too far in the trees intended for timber is unwise, since the mineral deposits make the wood harder to saw. The German experts claim that it would be a great thing, mineralizing trees just enough to make their wood almost fireproof without destroying its properties as wood.

Might Be Good Idea

Everyone In Japan Compelled To Carry Identification Disc

"Wherever you do anything, you die," In the near future you may be stopped by a policeman and asked this question. And if you can't produce the disc, you may meet a police officer's summons and a fine, says a writer in Answers. This may sound far-fetched, but a common remark the other day was that it would be good thing everybody carried an identification disc of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone wears such a disc around the neck from their northwards. Apart from the fact that it is a convenience in case of an accident, it would also be a safeguard against loss of memory, of which there have been many instances.

Some Flea Before It. There are many who have been afflicted with sores and have driven their way with Dr. Thomas' Electric Oil. All it does is to soothe the skin and lessen the pain in applying this ointment. As there is nothing like it to be had. It is cheap, but it is in no way expressed by its low price.

Two Diplomats Honored

Several Canadians Also Received Honorary Degrees at Dalhousie University

America's minister to Canada Hon. William Phillips, and Canada's minister to the United States Hon. Vincent Massey, were among those receiving honorary degrees at Dalhousie University's reunion convocation. Other distinguished men to be honored were Hon. E. N. Rhodes, P.C., Premier of Nova Scotia; Hon. A. K. MacLean, president of the Eschschauer Court of Canada; Col. the Hon. J. L. Haulton, Minister of National Defence and Chief Justice A. M. Morrison of the Supreme Court of British Columbia.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

New Company Organized

Will Manufacture Briquettes From Dried Coal in Souris District

The Canadian Coal Briquettes & Fuel Ltd., has been organized by a number of prominent financiers and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District of southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The company, it is stated, owns 800 acres of coal in the Souris district with an estimated tonnage of 8,000,000 tons.

Miss Odelliver: If I could lose all my money would you love me just the same?

Mr. Sea-Dumster: Just the same, my dear, only I'd be so busy earning my living you wouldn't be able to notice it.

Kill that corn with Minard's Liniment.

Unconquered by days of heavy toll. Full of fire for the next tough ignition job—Eveready Hot-Shots have made themselves a national reputation for sheer strength and long life. Metal cases shed water—keep out penetrating damp and save battery power. Look for the name Eveready on each battery—if it's not an Eveready, it's not a genuine "Hot-Shot."

Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen, Hon. J. H. Thomas, Minister of Employment in the Ramsay MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer; and Mr. Amery, former Minister for the Dominions. Mr. Amery is in Canada on holiday, but they are none the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibilities of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is made in his official capacity as Minister of Employment with the object of endeavoring to find out in what ways Canada can assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, or evolved, ways and means to accomplish this object, to secure the co-operation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers of British unemployed would be transferred to this Dominion. As soon as Canada may be having a large proportion of its incoming settlers of British birth, this Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention, on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration are, he says, two quite separate and distinct problems and should be tackled on their own merits.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with, and the sympathetic support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases of British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He set out in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy. He has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us rather than from others."

This should appeal to the people of Canada as good business. It is a self-respecting proposal for both parties to it. For example, Mr. Thomas points out that Canada imports over 10,000,000 tons of coal from the United States. He wants, and says he is going to get, some of that coal business for Britain, Canada's best customer, and thereby assist the coal mining industry of the Old Land and supply work for some of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British dock hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will strike a responsive chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariffs, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion to pursue is to offer tariff action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchases that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

Get Your Spectled Beauties
 A new method of taking trout from the San Jacinto Mountain streams has been discovered.
 It appears that two local fishermen were having poor luck whipping Strawberry Creek, when one suggested that the bait be soaked in some of the booting one of them happened to have brought along. This was tried, and at the first cast the rod bent nearly double, and it took the combined efforts of the two sportmen to reel in the prize.
 Then it was discovered, that the worm had seized a big fish by the throat and was choking it to death.

DOORBOBBER SENTENCED TO SIX MONTHS
 Nelson, B. C.—Prosecution of 128 Doorbobbler, arrested on August 29 and charged with disturbing on the highway near South Okanagan, was concluded Saturday. Of the accused, 122 were convicted, 12 discharged, and eight charges against nine others were withdrawn.
 Six months imprisonment with hard labor, was the sentence given

In a closed court following the conclusion of proceedings.
 The Doorbobbler were brought before Magistrate John Carmel in groups of five. They took their sentences quietly. Magistrate Carmel warned the prisoners that they might have been prosecuted on several additional counts of an equally serious nature so that charges laid against them. Recurrences of such instances would discover a court that would not deal so leniently, he said.

SCHOOL FAIR FOR GEM

The people of Gem Colony are holding a school fair for the fall. The fair is being organized and managed by Mr. Berger, new school principal at Gem, who has had considerable experience with this kind of work, and who is displaying an unlimited supply of energy in getting the fair under way.
 To hold a school fair requires a great deal of work and the hearty co-operation of the community. Mr. Berger should find no difficulty in getting the support of the people of Gem, and given their co-operation, we are confident the fair will be a success.

Some years ago, Bassano and the schools of the neighboring districts held an annual fair. It was discontinued because of lack of a leader who had sufficient time to devote to the work. Perhaps the Gem fair will stimulate interest in school fair work and result in bringing all the schools together again in one big annual event.

SWIMMING POOL A GREAT SUCCESS

The Bassano swimming pool has been a great success this year, and the Board of Trade is to be commended for providing the townspeople with the means to enjoy the healthful sport of swimming.
 The swimming pool committee expended much time and effort to give the town a pool, and it is gratifying to find their efforts have been so successful, and the results of their work appreciated by the people.
 Built primarily for the boys and girls, the pool has been very popular with the adults as well. It has provided everybody with the means to practice a healthful and enjoyable sport, and if present restrictive plans are carried out, the pool will be made even more attractive next season, and organized competition will increase the popularity of water sports.

FARMS ARE MOST VALUABLE

While a gold mine is used as a symbol of wealth, the farm has proved to be a far greater wealth producer than the mine. In a speech before the British Association at Johannesburg, South Africa, Sir Thomas Holland gave some interesting figures in comparing gold production and agricultural wealth.
 Even in South Africa, Sir Thomas pointed out, where half the world's gold supply is produced, the value of the metal is still less than that of the pastoral and agricultural products. Gold and diamonds introduced temporary diversions in the economic expansion of South Africa, but the dominant interests of the nation are still agricultural.
 In recent years Canada has come to the fore as a gold producing country. The gold mines of Northern Ontario rank among the richest in the world, and immense supplies of the precious metal have recently been found in northern Manitoba, but the value of agricultural products in both these provinces still far exceeds their mineral wealth.

LESS WHEAT, MORE BUTTER

One peculiar effect wheat production and wheat prices have on agriculture in the western provinces is that just in proportion as there is more money in wheat the western farmer finds it difficult to milk cows. When wheat prices are low and profits in grain growing are small, the farmer turns for relief to the dairy cow. The dairy industry seems to thrive on the adversity of the wheat grower.
 It is interesting to examine the dairy figures for Alberta for the first five months of 1929, when wheat prices were at a low level. During this period cream receipts showed an increase of 18 per cent over the same five months of 1928. The increase in Saskatchewan was more pronounced, amounting to 54 per cent, and in Manitoba the increase was 34.5 per cent.
 The dairy industry is a profitable one for the farmer, and it seems unfortunate that it is not placed on a more sound basis.

CANADA'S COAL MINES

OTTAWA—Of the 497 coal mines operating in Canada, 297 are in Alberta; 56 in Saskatchewan; 40 in Nova Scotia, 36 in British Columbia, 16 in New Brunswick, and one in Yukon Territory. There is more than \$146,000,000 capital invested in these mines, which give employment to 28,500 persons.

THE DISPUTE

(by Phillip M. Rankin)
 Thousands wonder,
 Why the struggle,
 Why the task?
 Why the burden,
 Why the yoke?
 Is it all
 The Devil's joke?
 Why the bar,
 And why the bond,
 If there is nothing
 There beyond?
 Head and heart
 Quarrel and cry;
 Head shouts: nothing!
 Heart—You lie!

INSPIRATIONS

Bruce, with eyes growing wider,
 Watched a persevering spider,
 Then rose
 And swiped the English army on the nose.
 Newton, sitting on a wall,
 Watched an autumn apple fall,
 And found
 That gravitation brought apples to the ground.
 Watt, observing someone's kettle
 Boiling near the chimney settle,
 Designed
 A patent engine that amazed man-kind.
 I have looked at spider's toiling,
 Apples falling, Kettles boiling;
 My hat!
 If I could only think of things like that.
 —Punch.

PETER, THE POSTMAN

Hear the sad story of the postman who delivers the letters at Eymouth, a small Derwickshire fishing town. In the town there are 108 Douglases, 102 Patersons, 78 Collins, 56 Craigs, 52 Lougheys, 48 Maltmans, 45 Allchons, and 45 Youngs. The postman would be glad to hear that the Campbells are coming—or the MacDonalds, just to have a little variety.

Call Bridges

The stately old aristocrat was approached somewhat cockily by a rich and vulgar young man, who announced: "I say, sir, I am thinking of marrying one of your girls. Have I your permission?"
 "Yes, indeed," was the reply. "Which one interests you? The maid or the cook?"

Hit-and-Run Flyer

"Oh, Gerald, I've been stung by a wasp!"
 "Quick! put some ammonia on it!"
 "I can't, it's gone!"

Wholesale Obeques

"Sir, would you give five dollars to bury a saxophone player?"
 "Here's thirty dollars. Bury six of them."

Sold behind the Wheel

ONLY behind the wheel, can you learn the whole amazing truth about Chevrolet. There you will experience the advantages of a smooth, six-cylinder, valve-in-head engine, the superiority of design, and staunch construction which make body by Fisher an emblem of distinction. You will be astounded at the performance, luxury, and quality now available, for the first time in the price range of a four. And you'll realize why over a million Chevrolet Six owners have been "sold behind the wheel" . . . why they would never again be satisfied with anything less than Chevrolet gives them . . . and why Chevrolet is one of the most sensational values ever offered. Take your trial ride today. Get behind the wheel . . . and sell yourself the car you want to own.

Something New In Radios

The SCREEN GRID.

Hear the new Atwater-Kent Masterpiece

Atwater Kent—the leader in radio since radio began—has beaten every record with this new Screen-Grid Set. It draws more out of the air, sends more to the listener.
 Receiving new stations from away across the map come swinging in at your finger touch. Needle-point selection separates them and gives you the station you want.
 See it now in the handsome new console models made by one of Canada's leading furniture factories. Hear it!—You'll realize instantly why it is giving the world's most popular radio.

PRIZE LIST FOR
GEM SCHOOL FAIR

Garden Products
To be exhibited separately, not in collections.

Vegetables and Herbs

Prizes: 75c, 50c, and 25c.

1. Carrots, 4.

2. Beets, 4.

3. Turnips, 4.

4. Turnips, 4.

5. Mangel, 2.

6. One plant dried Peas.

7. Cabbages, 2.

8. Potatoes, white, (any variety), 12 tubers.

9. Potatoes, red (any variety), 12 tubers.

10. Potatoes, any other color, 12 tubers.

Flowers

Prizes: 75c, 50c, and 25c.

11. Best Bouquet of Flowers, any variety.

Grains

Prizes: 75c, 50c, and 25c.

12. Sheaf of Wheat.

13. Sheaf of Oats.

14. Sheaf of Barley.

15. Sheaf of Corn, 4 stalks.

16. Collection of grasses and clovers cured and named.

17. 1 quart threshed wheat (variety named).

18. 1 quart threshed oats (variety named).

19. 1 quart threshed barley (variety named).

20. 4 cobs corn.

Livestock

Prizes: \$5.00, \$2.00, and \$1.00.

21. Grade beef heifer or steer born in current year.

22. Pure bred beef heifer or pure bred bull born in current year.

23. Grade dairy heifer, full bred, born in current year.

24. Pure bred dairy heifer or pure bred dairy bull born in current year.

25. Pair of pigs, bacon type, born in current year. (Scale No. 1 suggested on above).

26. Poultry, born in current year, halter broken.

27. Best lamb, born in current year. (Scale No. 5 suggested on above).

Poultry

Prizes: \$2.00, \$1.00, and \$1.00.

28. Pen of chickens, American or English breeds, pen to consist of two pullets and one cockerel.

29. Pen of chickens, Mediterranean breeds; pen to consist of 2 pullets. (Scale No. 4 suggested on above).

30. Cockerel, American or English breeds. (Birds entered in pen class not eligible).

31. Pullet, American or English breeds. (Birds entered in pen class not eligible).

32. Cockerel, Mediterranean breeds. (Birds entered in pen class not eligible).

Here and There

380-
Cassidians gathered by the New Brunswick Government, Bureau of Information and Tourist Travel show an increase of 25 per cent. in the number of motor tourists from the United States entering the province last year. The Ontario crop is estimated at 77,000 barrels, more than last year. The Ontario crop is estimated at 77,000 barrels, more than last year. The Ontario crop is estimated at 77,000 barrels, more than last year.

His Excellency the Governor-General of Canada will extend the patronage to the Canadian Pacific Express of British Columbia. Canadian music to be given across Canada, beginning in September and continuing until Spring of 1930, according to information given by J. Murray Gibson, general publicity agent of the railway.

Fishing bowed to charity one day recently at St. James Island, Canadian Pacific angling resort in the Georgian Bay, where Mrs. Williams of Jackson, Mich., got a bite simultaneously with his wife, both fishing from the same boat. The guide couldn't handle the canoe as both anglers would have a chance to land a fish, so the judge put pressure on his catch which broke away. Mrs. Williams, after a half-hour fight landed a large fish.

Lord Lake of Ravensham, chairman of Norfolk Ltd., arrived in Canada recently on the Empress of Australia, en route to Australia. His Lordship is operating a settlement scheme in the Argentine whereby farmers rent lands from a company, paying 15 per cent. on the company's marketing of their crops. He is contemplating a similar company in Australia in connection with sheep raising. He still examines possibilities in the Prairies for a similar settlement organization.

Heavy entries are reported for all classes of athletic, piping and dancing events to be decided at the annual Galt and Scotch Music Festival to be held at Banff, Sept. 10-September 2, as also for the Douglas track and field championships to be held there Labor Day. A practically new track has been built at Banff to accommodate the sports scheduled.

Dissolution of the present Japanese Government and the advent of a new one within a year is predicted by Yonemitsu T. Matsuoka, Japanese Minister to Scandinavia, who arrived at Vancouver recently aboard Canadian Pacific steamer Empress of France on his way to resume diplomatic duties at Stockholm. The present Japanese Premier is in minority control of the Diet.

William Baird, steamship passenger traffic manager of the Canadian Pacific Railway who inspected the Bremen in New York recently, that in view of the shorter distance between Cherbourg and New York, the 10,000-ton Canadian Pacific liner Empress of Britain to be placed in Atlantic service next spring, might make a strong bid for the blue flag of the Atlantic. This steamer will be an oil burner, 720 feet long, 97-foot beam and will carry more than 1100 passengers in first, second and third class.

Paul Scull, all-American half-back and star of the University of Pennsylvania, has added to his laurels by earning in company with Jay and Ed Hopkins the coveted gold button of the famous order of Trail Riders of the Canadian Rockies. With a cook and guide, the trio made an expedition from Banff to the Columbia Ice Fields, said to be the largest body of ice south of the Arctic Circle.

Eleven important cities, the localities of the ten most important products of the British Islands, and latitude.

102. High School: Collection of four maps: (1) First Homes of Civilization; (2) The Greek World; (3) The Roman Empire A.D. 117; (4) Europe, A.D. 814.

N. Classes 97, 98, and 99 are not to be colored, but classes 100, 101, and 102 may be colored.

ATHLETICS

Prizes: 75c, 50c, 25c.

1. Running broad jump, boys under 14 years.

2. Running broad jump, boys under 14 years.

3. Running broad jump, open class.

4. Running hop-step-and-jump, boys under 12 years.

5. Running hop-step-and-jump, boys under 14 years.

6. Running hop-step-and-jump, open class.

7. 50 yard dash, boys under 8.

8. 50 yard dash, girls under 8.

9. 75 yard dash, boys under 10.

10. 75 yard dash, girls under 10.

11. 100 yard dash, boys under 12.

12. 100 yard dash, girls, open class.

13. 100 yard dash, boys, open class.

14. 100 yard dash, girls, open class.

15. Relay race, four pupils from a school making a team.

16. Lady teachers' race, 75 yards.

17. Wheelbarrow race, under 12.

18. Wheelbarrow race, open class.

19. Sack race, under 12.

20. Sack race, open class.

21. Jockey race, under 12.

22. Jockey race, open class.

23. Three-legged race, boys, open.

24. Three-legged race, boys, open.

25. Three-legged race, girls, under 12 years.

26. Three-legged race, girls, open.

27. Potato race, boys.

28. Potato race, girls.

Commercial apple crop in the province of Nova Scotia this year will total about 1,000,000 barrels, says a statement from the Nova Scotia Department of Agriculture. The Ontario crop is estimated at 77,000 barrels, more than last year. The Ontario crop is estimated at 77,000 barrels, more than last year. The Ontario crop is estimated at 77,000 barrels, more than last year.

As a result of experiments conducted over several years past, officials of the Canadian Federal Department of Agriculture feel assured that two or three varieties of wheat have been found last developed which have been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution.

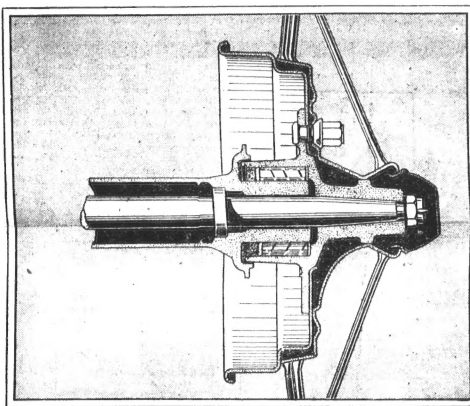

Erna Anderson, his wife, two daughters and two sons, are the first settlers to arrive for the new Danish Colony in Hants County, Nova Scotia, which is being promoted by the Canadian Pacific Railway Colonization and Development Department. They have gone to the Winton district where they purchased a farm and will go into dairying and hog raising on a large scale.

Since 1921 the total farmland in the Dominion has increased from 2,544,000 to 2,600,000 acres, more than 56,000 acres, having been developed in 1928. Developments now near completion or in active progress include the development of the Prairie Provinces the developed horse-power has nearly doubled since 1921.

THE FORD CAR REAR AXLE

Expense no object in Achieving Perfection

THE rear axle of the Ford car is of the three-quarter floating type with spiral bevel gear. The pinion hub is exceptionally heavy, and as the pinion is carried on double taper roller bearings, perfect alignment of the gear is always assured. The rear axle has a total of four roller bearings which add considerably to the cost of manufacture but are a protection for the owner against wear.

Special care is taken to insure silence in the pinion and ring gears. These are made up in pairs and carefully matched, each set being run in to eliminate all possibility of noise in operation.

The differential side gears are forged integral on the rear axle shafts and the teeth then cut. This permits of lighter and more simple construction. The shafts are unusually strong, and, as the centre line of the wheel comes over the bearings, there is no overhang of the axle shaft, and it has no weight to support.

The use of malleable castings is eliminated in this new axle housing which is made entirely of steel. Ball forgings welded to steel tubing make up the shaft housing which is bolted to an all steel differential housing. The care and skill devoted to the manufacture and assembly of rear axle parts is typical of the high standards of Ford engineering.

Determining Period of the Year Most Important For Land To Receive Normal Precipitation

Opinion differs as to the period of the year in which it is most important for the land to receive normal precipitation in order that moisture reserves may be adequate for the growing crops. Recently a detailed study has been made of 18 representative districts over the prairies during the last 32 years, and certain conclusions arrived at on the basis of these 154 seasons.

Out of 82 seasons, when Fall and Winter precipitation was normal or above normal, in 75 instances fall to heavy stands resulted irrespective of the degree of condition following after, which in 42 cases was below normal. Fall and winter deficiency was made up by above normal spring and summer rains in only 28 out of 82 seasons.

On the other hand, on the 17 seasons when below normal spring and summer rainfall was preceded by above normal fall and winter precipitation, the resulting crops were fair to heavy.

The evidence would seem to point to the fact that, while fall and winter moisture gives the guarantee of a good crop, still it is a most important factor and makes probable a good yield.

An examination of last fall and winter precipitation records reveal that this spring considerable crops of grain if crop prospects were to be regarded in any way as favorable. From September, 1928, to March, 1929, the average rain and snowfall was appreciably less than half normal, not a single weather reporting district receiving its quota.

Compared with inadequate subsoil moisture came an unusually dry spring and summer, when April was the only month with even average rainfall, while the rest of the month, June and July, were two-thirds and a little over one-half of normal respectively.

So far as the present crop is concerned, it required an unusually large amount of spring and summer rainfall which did not materialize. The suits of this lack are now evident.

Advantage Of Rough Seas

Determine Whether Person Is Sane, Says Medical Inspector

There is nothing like a sea voyage to determine whether or not you are crazy. This was a declaration of broad human interest recently by Dr. Page, Chief Medical Inspector of Immigration.

Dr. Page points to experience to justify his opinion. This season a dozen immigrants who were apparently normal on embarkation and underwent the medical examination before they did so, were turned back to this side because of displaying mental derangement during or in sequence to the voyage.

Dr. Page casts no reflection on the examination process and the efficiency of the staff there but says that often a rough sea voyage will upset the mental equilibrium and leave it upset. It is the test, he said, and he is inclined to recommend it to those who are not quite sure of themselves.

Why She Was Satisfied

It was necessary for taxation purposes to decide on which side of the Canadian and United States border a farm which an elderly lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The lady smiled with relief. "I'm so glad to know that," she said. "I've heard that the winters in Canada are often terribly severe."

Japan demands for phonograph records have largely toward the work of great composers, whereas in China nine-tenths of the records are traditional Chinese tunes.

Canada's North Country

Railways Laid In Wilderness Justifying Optimism Of Pioneers

Running north between North Bay and Cochrane and thence onwarp towards Winnipeg, one looks from an observation car to see marsh and rock and the bare, trunked trees standing in stark ugliness against the sky. Contemplating it all, one marvels at the courage of the men who laid steel along such wastes, at the fortitude of the men who first went into such a wilderness.

Yet this country, ugly and so seemingly useless, promises to become one of the richest portions of Canada. The story of what it has yielded and promises to yield in minerals, in gold and silver, copper and nickel, is known to all. And now comes the discovery of rich coal deposits in the Athabasca River, in the Blacksmith Rapids area, north of Cochrane. Coal is promised to be added to the rest of this province's riches.

Providence, truly, has been good to Canada. We have one of the great frontiers of the world, a diversified land, the fact that conditions vary in different districts. Failures are not universal. Even in years generally good, there are districts which are seriously affected. In this year, the generally bad crop, there are districts which will harvest good crops. Unfortunately, there does not appear to be many areas where the outlook is all promising.

With the probability that only 150,000,000 bushels of wheat will be available for export this year, the question as to effect on various grain ports is important. Port William and Port Arthur will make a strong bid for the bulk of the business and, in view of the mountain haul, and the longer water haul, it is likely that Vancouver will find its volume of grain business very materially reduced this year. And if, as is hoped, the grade of wheat is better than that of last year, the grade of flour which will be manufactured from it will be better than the average, with the result that the Orientate, an important factor in the last crop year, will be less in the next year. The big crop of low-grade wheat was an important recent factor in promoting exports of flour to the Orient.

These are probabilities which should be overlooked in considering the effects of existing conditions on Canadian export trade in the next twelve months.—The Financial Post.

Could Learn From Canada

Australia Would Follow Example Of Dominion In Handling Wool Industry

The Bulletin, Sydney, Australia, says:—Canada doesn't go in for compulsory trade-unionism or basic-wage commissions, or arbitration courts, or anything like that. It believes that the less Government meddling in the industry the better for both employers and employees; and as a warrant for its belief it can point to prosperous industries, recent wage increases in many trades, low unemployment returns, and comparative freedom from strikes. In 1927 the number of disputes was 79, the number of workmen involved 22,283, and the number of working days lost 165,285. Australia, with its expensive apparatus of industrial tribunals had 441 strikes, 206,757 involved employees, and 1,731,861 lost working days in that same year. In short Canada is beating us badly, and we ought to be too proud to let Canada beat us badly though not too proud to learn from its example.

J. N. K. MacCallister, Assistant Commissioner, Dept. Colonization and Development, Canadian Pacific Railway, who has been elected Chairman, Immigration Committee, American Railway Development Association for the ensuing year.

Failure Not Universal

But Small Western Crop Will Affect Grain Ports

In the discussion of the effect of a small wheat crop on business commercial interests concerned with Western Canada should not overlook the fact that conditions vary in different districts. Failures are not universal. Even in years generally good, there are districts which are seriously affected. In this year, the generally bad crop, there are districts which will harvest good crops. Unfortunately, there does not appear to be many areas where the outlook is all promising.

With the probability that only 150,000,000 bushels of wheat will be available for export this year, the question as to effect on various grain ports is important. Port William and Port Arthur will make a strong bid for the bulk of the business and, in view of the mountain haul, and the longer water haul, it is likely that Vancouver will find its volume of grain business very materially reduced this year. And if, as is hoped, the grade of wheat is better than that of last year, the grade of flour which will be manufactured from it will be better than the average, with the result that the Orientate, an important factor in the last crop year, will be less in the next year. The big crop of low-grade wheat was an important recent factor in promoting exports of flour to the Orient.

These are probabilities which should be overlooked in considering the effects of existing conditions on Canadian export trade in the next twelve months.—The Financial Post.

Object To Being Called Siwash Which Means Savage

A small coastal steamer tied up recently at one of the Indian villages on the northern coast of British Columbia. The usual crowd of braves came on board the steamer, and the mate went ashore to engage a few extra hands to help in the unloading of the cargo. All was ready for a start when the skipper hailed the mate. "How many men have you now?" "Four white men in the hold, sir, and five Siwash on deck." Siwash is a much-used word to denote anything Indian, but few people are aware of its real meaning. The word had scarcely passed the mate's lips before the Indian chief waked out of his seeming lethargy, and, trembling with passion, strode up to the mate. "Why for you call me Siwash. You know what Siwash mean, eh? Siwash mean savage—I am no savage!" The situation promised to become very tense, and to appease the wounded pride of the red man, the captain spoke sharply to the mate, who replied that he had in no way meant to give offence. The chief was somewhat mollified, and in a pathetic voice appealed to the passenger nearby. "How you like?"—(he had to stop for a few seconds)—"How you like if I call you Whitesaw?"

These are probabilities which should be overlooked in considering the effects of existing conditions on Canadian export trade in the next twelve months.—The Financial Post.

You know what Siwash mean, eh? Siwash mean savage—I am no savage!" The situation promised to become very tense, and to appease the wounded pride of the red man, the captain spoke sharply to the mate, who replied that he had in no way meant to give offence. The chief was somewhat mollified, and in a pathetic voice appealed to the passenger nearby. "How you like?"—(he had to stop for a few seconds)—"How you like if I call you Whitesaw?"

These are probabilities which should be overlooked in considering the effects of existing conditions on Canadian export trade in the next twelve months.—The Financial Post.

Could Learn From Canada

Australia Would Follow Example Of Dominion In Handling Wool Industry

The Bulletin, Sydney, Australia, says:—Canada doesn't go in for compulsory trade-unionism or basic-wage commissions, or arbitration courts, or anything like that. It believes that the less Government meddling in the industry the better for both employers and employees; and as a warrant for its belief it can point to prosperous industries, recent wage increases in many trades, low unemployment returns, and comparative freedom from strikes. In 1927 the number of disputes was 79, the number of workmen involved 22,283, and the number of working days lost 165,285. Australia, with its expensive apparatus of industrial tribunals had 441 strikes, 206,757 involved employees, and 1,731,861 lost working days in that same year. In short Canada is beating us badly, and we ought to be too proud to let Canada beat us badly though not too proud to learn from its example.

J. N. K. MacCallister, Assistant Commissioner, Dept. Colonization and Development, Canadian Pacific Railway, who has been elected Chairman, Immigration Committee, American Railway Development Association for the ensuing year.

Failure Not Universal

But Small Western Crop Will Affect Grain Ports

In the discussion of the effect of a small wheat crop on business commercial interests concerned with Western Canada should not overlook the fact that conditions vary in different districts. Failures are not universal. Even in years generally good, there are districts which are seriously affected. In this year, the generally bad crop, there are districts which will harvest good crops. Unfortunately, there does not appear to be many areas where the outlook is all promising.

With the probability that only 150,000,000 bushels of wheat will be available for export this year, the question as to effect on various grain ports is important. Port William and Port Arthur will make a strong bid for the bulk of the business and, in view of the mountain haul, and the longer water haul, it is likely that Vancouver will find its volume of grain business very materially reduced this year. And if, as is hoped, the grade of wheat is better than that of last year, the grade of flour which will be manufactured from it will be better than the average, with the result that the Orientate, an important factor in the last crop year, will be less in the next year. The big crop of low-grade wheat was an important recent factor in promoting exports of flour to the Orient.

These are probabilities which should be overlooked in considering the effects of existing conditions on Canadian export trade in the next twelve months.—The Financial Post.

Term Resented By Indians

Object To Being Called Siwash Which Means Savage

A small coastal steamer tied up recently at one of the Indian villages on the northern coast of British Columbia. The usual crowd of braves came on board the steamer, and the mate went ashore to engage a few extra hands to help in the unloading of the cargo. All was ready for a start when the skipper hailed the mate. "How many men have you now?" "Four white men in the hold, sir, and five Siwash on deck." Siwash is a much-used word to denote anything Indian, but few people are aware of its real meaning. The word had scarcely passed the mate's lips before the Indian chief waked out of his seeming lethargy, and, trembling with passion, strode up to the mate. "Why for you call me Siwash. You know what Siwash mean, eh? Siwash mean savage—I am no savage!" The situation promised to become very tense, and to appease the wounded pride of the red man, the captain spoke sharply to the mate, who replied that he had in no way meant to give offence. The chief was somewhat mollified, and in a pathetic voice appealed to the passenger nearby. "How you like?"—(he had to stop for a few seconds)—"How you like if I call you Whitesaw?"

HOMESTEADS IN ALBERTA

CALGARY—Weekly reports show that during the first five months of the year, 5,200 homesteads, representing 663,240 acres of land, were taken out, Alberta's share within the period being 2,047, as against 2,349 for the similar period of 1928. Settlement was mainly in the Edmonton, Grande Prairie, Peace River, and Prince Albert districts. It is noted that in the fall of 1923 there were only 25 settlers in the whole of the Peace River country, while in March, 1929, there were 130 completed, and many under construction.

VANCOUVER IN GREAT PORT PACIFIC PORT

VANCOUVER—According to figures obtained by Canadian Pacific Steamships, Limited, the port of Vancouver now ranks first among ports of the Pacific coast, outstripping San Francisco and Los Angeles in volume of inward and outward traffic and tonnage of imports and exports with a total of \$390,787 tons of food imported into and exported from Vancouver in 1928 it surpasses all competitors, the nearest in line being Seattle.

FLEET OF COMBINES

LETHBRIDGE—A fleet of seven combines harvested and threshed 10,000 bushels of wheat a day on the big farm of C. G. Noble at Nobleford. These machines included the largest one in use in Canada.

Getting the Low-Down—Love-Sick Nephew: "Uncle, what's the best way of finding out what she thinks of me?"
Bachelor Uncle: "Marry her, my boy."

Reparé in Oklahoma—An Oklahoma City paper heartily said Monday that their Robinson street was only a cowpath forty years ago.
Many things can and do happen in forty years—what was then a cowpath is now a very popular parade ground for all manner of jackasses and a meeting place for half-dressed chickens.

Poorly's Alibi—"You're scared to fight."
"I ain't, but mother'll lick me."
"An' how'll she know?"
"She'll see the doctor goin' to your house."

Local News

H. W. Ford was a business visitor to Calgary on Tuesday.

Miss Rogers, of Calgary, is a guest this week at the home of her sister, Mrs. Jas. B. Donaldson.

Iris Young was in from the farm at Majorville early this week, spending Sunday and Monday here.

Miss E. McArthur visited in Bassano on Sunday with Mr. and Mrs. E. N. Hille.

There will be a dance in the Masonic Community Hall, Bassano, on Friday evening this week, Sept. 13th.

A son was born to Mr. and Mrs. A. Menzel, of Bassano, on Sunday, Sept. 1st.

Mrs. J. O'Bray, of Gleichen, is a patient in the hospital here. She recently underwent an operation.

Harvey Smith was around again this week after his recent illness, although he is still very weak.

Frank Mead is around again after being laid up for a few days by trouble with his leg.

W. E. Sambooke was in Calgary early this week on his weekly trip to the Western Airways for flying practice.

Wallace Flanagan motored to Coultis, Alta., on Wednesday with his mother who has been visiting in Bassano.

J. T. Shaw, M. L. A. for Bow Valley, spent Saturday evening in Bassano. He returned to Calgary Sunday afternoon.

A baby girl was born to Mr. and Mrs. Jas. Robinson, of Calgary, on Monday, Sept. 9th, at the Bassano Hospital.

Dr. A. G. Scott, Dr. B. E. Barlow and H. D. Bacon made a motor trip to Calgary early this week, returning on Thursday.

The new house the C. P. R. is building for A. E. Stewart is nearing completion, and Mr. and Mrs. Stewart expect to move in very soon.

The vestry of the Anglican Church will give a whist drive and dance in the Masonic Community Hall on Friday, October 4th.

Rev. P. C. McCrae attended the presbytery meeting at Grace Church, Calgary, on Thursday of this week. He also visited in Crossfield.

Rev. Father Fitzpatrick has been appointed priest of St. Columba's Church, Bassano. Rev. Father Aeneas will be transferred to Coultis, Alta.

Mrs. W. J. Redmond and son returned home early Sunday morning. They have been visiting relatives in Loyal, Wisconsin, for the past couple of months.

Miss Nettie Laughren, of Majorville, formerly a member of the nursing staff of the Bassano Hospital, was married on September 4th to William Eric Huskins, of Majorville. They will reside in Vancouver.

CARD OF THANKS

We wish to express our heartfelt thanks to our many friends for their kindness and sympathy in our bereavement, and for the many beautiful floral tributes.

Mrs. C. Fisher and Ray.

An itinerant collector of old iron was trundling his barrow along a very narrow road. Behind him was a somewhat elderly motor, the impatient driver of which was hooting and tooting in his anxiety to pass the old-iron barrow.

The old iron merchant looked around at the car, and then addressed the owner: "All right, guv'nor, I'll call for that tomorrow."

The vicar was paying a periodical call upon his parishioners, and found Mrs. Brown busy over her wash-tub.
"Ah, Mrs. Brown," he remarked, "it is indeed well that we remember that 'cleanliness is next to godliness.'"

"Well, sir," said Mrs. Brown, looking up from her task, "in the Bible it may be next to godliness, but believe me, with kids like mine, it's next to impossible."

"Yes," said one man to another, "motoring is a great thing, I used to be sluggish before the motorizing craze, but now I'm spry and energetic."

"I didn't know you motored."
"I don't—I dodge."

WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1930 convention of the Trades and Labor Congress of Canada. The western city defeated Hamilton by 109 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,071, according to Lovett's Montreal Directory, the 37th volume of which is about to be published. The population of Greater Montreal is 1,224,059.

Vilhjalmur Stefansson, famous Arctic explorer declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Great Zepplin completed its 20,000 mile flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

Making Amazing Progress

Use Of English Has Outstripped All Other Languages

The amazing growth of the English language, surpassing that of any other during the past 100 years, was illustrated by statistics compiled by a newspaper published at Zurich, Switzerland.

English was spoken by less than 20,000,000 persons in 1850, the statistics showed, while at present no less than 100,000,000 people speak it natively, while an additional 60,000,000 understand it but do not consider it their native tongue.

The newspapers said that the rate of increase far outstripped all other languages and that there is no part of the world where the language is not spoken today.

Army Fights Locusts

Eighty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Hanevo District, of southern Bulgaria. Fire, smoke, and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

"Did you cancel all my engagements, as I told you, Smithers?"

"Yes, but Lady Millicent didn't take it very well. She says you were to marry her next Monday."

"Yesterday at the music hall I saw a man who had no hands play the piano."

"Well, by wife signs and she has no voice."

Aviators Had Hard Time

Had Almost Lost Hope When Rescued In Far North

After being eight days on Norton between Cape Lake and Norway House, where they made a forced landing, Lt. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an Air Force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the mail stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

Poet's Ashes Return Home

Brian Carman Laid To Rest In Family Plot At Fredrickton

The ashes of Brian Carman, who was Canada's greatest poet, now rest in a concrete tomb at the family burial plot at Forest Hill Cemetery, Fredrickton, overlooking the city where he was born.

The ashes were brought from New Canada, Connecticut, where he died to Fredrickton, and committed to their last resting place following a memorial service arranged by the Government of New Brunswick, and attended by distinguished men and women from many parts of Canada and the United States. One of Carman's best known poems was sung during the service at Christ Church Cathedral.

May Make Icebergs Visible At Night

Expert Making Series Of Experiments To Ensure Safer Navigation

Dr. Howard T. Barnes, internationally known ice-engineering expert, was at McGill University for a few days while his experimental ship, "The Ulfrun," was undergoing repair for a series of experiments in the Bay of Fundy.

Dr. Barnes stated that he had just completed three weeks of experimental work in the detection of icebergs at night in the vicinity of Newfoundland and Labrador, doing considerable photographic work for the further experimental study in the laboratories at McGill.

To develop methods of making the icebergs visible at night is the objective of Dr. Barnes' present investigations. If he is successful, ships will be able to proceed at full speed either in darkness or fog in the vicinity of icebergs without danger of collision. This he hopes will make the St. Lawrence route to Europe even safer than at present.

Petition For New Judicial District

Very Necessary To The Psa Say Members Of Bar Association

Members of The Psa Bar Association will petition the provincial government to make a new judicial district there comprising all the territory north of Township 44, in Manitoba, according to a decision made at a meeting of the barriesters.

It was pointed out that it was of great importance to the Psa to have a judicial district. The lawyers do not see that a resident judge be appointed, since the amount of work is not yet sufficient to make such a source necessary, but they do feel that, in the interests of the north, a judicial district here is necessary.

When Breakfast Is Ready

Punch's famous advice to those about to get married has been quoted, we believe, by the American publication, "Life," which reports a husband as saying to his wife: "Well, I hear you scraping the toast, so I suppose breakfast is ready."—Toronto Mail and Empire.

First Traveller—I hear they aren't sending any more mail to Washington.

Second Traveller—How's that?

First Traveller—He's dead.

Tribute To Canada

Winston Churchill Sees Great Possibilities For This Dominion

Thirty years ago a man traced the geographical formation of Canada on the map, pointed out her enormous spread of land and her small population, and said that a country of this size could not endure and progress under these conditions. Today, thirty years later, the voice of the pessimist has been silenced.

With her agricultural and mineral wealth and her great northland only partially developed, Canada has taken her place among the nations of the world and her march of progress will go on.

This tribute to the Dominion of Canada voiced by the Rt. Hon. Winston Churchill, former Chancellor of the British Exchequer, soldier, author and statesman, brought a wild outburst of applause from the 750 persons who attended the luncheon held in his honor in Calgary. The famous British visitor also paid a tribute to Calgary and the province of Alberta in general. He pointed out that H.R.H. the Prince of Wales after visiting every part of the British Empire decided to make his home in Alberta. He referred to Alberta's oil and mineral wealth and said that he was pleased and surprised by the immense development which was being undertaken in Turner Valley.

To Study Empire Timber

With a view to finding new uses and show markets for the timber resources of the Empire, the Empire Marketing Board has approved a capital grant, not to exceed \$50,000, to be devoted to research on Empire forests at the Princess Rutherford Forest Products Research Laboratory, London, under the direction of the Department of Scientific and Industrial Research.

Winston Churchill Sees Great Possibilities For This Dominion

Thirty years ago a man traced the geographical formation of Canada on the map, pointed out her enormous spread of land and her small population, and said that a country of this size could not endure and progress under these conditions. Today, thirty years later, the voice of the pessimist has been silenced.

When Breakfast Is Ready

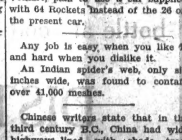

Punch's famous advice to those about to get married has been quoted, we believe, by the American publication, "Life," which reports a husband as saying to his wife: "Well, I hear you scraping the toast, so I suppose breakfast is ready."—Toronto Mail and Empire.

First Traveller—I hear they aren't sending any more mail to Washington.

Second Traveller—How's that?

First Traveller—He's dead.

The human body generates enough heat during a day to melt 44 pounds of ice and raise the liquid to boiling point.

New Means Of Solving Crime

Creator Of Sherlock Holmes Speaks Of Impressions Of Mediums

In the well equipped police station of the future a trained clairvoyant would be part of the detective department, according to the creator of "Sherlock Holmes."

Sir Arthur Conan Doyle discussed the possibilities of a clairvoyant or a psychometrist helping in the solution of the "Rightest" mystery and other puzzling cases confronting detectives throughout the world. He envisioned a day when criminals would have to be detected by anything used in carrying out crime, otherwise a psychometrist would "sense" clues and hand them to detectives.

"Although I do not think anyone could ever be convicted on the knowledge or evidence of a clairvoyant, I do believe the latter can find clues where the police fail," Sir Arthur said.

"The proper term is psychometrist, the work having nothing to do with spiritism. It is purely a matter of the medium's own latent powers."

Sir Arthur gave as an example the finding of a blood-stained knife. The psychometrist, called to the scene, would inform the detective of the position of the knife.

"I have a strong impression of a man with a long black mustache, wearing a brown suit."

According to Sir Arthur this would give the detective something to work on, as no matter how skillful a detective he might be, he could not receive an impression of the man's appearance from seeing the knife.

A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvelous woman mathematician has been discovered in the person of Nina Glogolova, 22 years old, who does in her mind, in from two to 20 seconds, calculations which require hours of experts to do, in the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before her arrival in Canada, Professor Korovin and Professor Chelovsky, mathematicians; Koljinsky, the engineer; and Dr. Kleiser, a physician, Miss Glogolova with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seemed no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable and she can repeat, having heard them only once, long lists of words. The communications pronounce this woman of Russian birth, greater than Arago or other prodigies on record.

A new type of lifeboat, recently tested in British waters, holds 800 passengers and is equipped with radio.

Western Air Mail

Expected That Service Will Commence About First Of November

Present indications are that air mail service in the west will commence about November 3. G. Herling, of Ottawa, superintendent of air mail service for the postal department, stated in Saskatoon. The service will connect Winnipeg, Edmonton and Calgary.

"Mr. Veniot, Postmaster General, is particularly anxious to make the service an outstanding success and in co-operating with the national Minister of Defense to obtain rapid installation of lighting facilities and landing fields," Mr. Herling said.

Establishing the air mail route will mean a tremendous amount of work. Some 1,500 miles of territory have to be covered. Considering the fact that the main channel for the service will be through Winnipeg and Calgary, it has been thought desirable that the first steps should be taken toward lighting that particular part of the link. This task may not be accomplished for some weeks.

On completion of the work on the main link it is understood that provision will be made for night flying and intermediate flying fields between Regina, Saskatoon and Edmonton.

Investigating New Marketing System

May Market Wheat In Europe On Basis Of Protein Content

Dr. Robert Newton, professor of field crops at the University of Alberta, has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of parliament.

Suggestion that wheat investigation be undertaken was made by the agricultural committee of the House of Commons last session. The announcement that the work would be done by Dr. Newton, was made by Dr. H. M. Tory, at a session of a committee of the research council here.

The report of grading of wheat protein content, published by the research council for the committee, was approved.

Canadians

Rising Generation Should Foster A Belief In Themselves As Canadians

Ancestry is something of which every man has a right to be proud, but, whether native-born or not, it should not prevent a man's belief in himself as a Canadian. At our banquets and public gatherings, men of Canadian birth are prone to brag of their Scotch, English or Irish descent. If they placed more stress on the fact that they are Canadians, it would be less likely to excite a belief in themselves as Canadians. At our banquets and public gatherings, men of Canadian birth are prone to brag of their Scotch, English or Irish descent. If they placed more stress on the fact that they are Canadians, it would be less likely to excite a belief in themselves as Canadians. WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE WIN is the all-powerful life producer. Nature's universal distributor of heat and light, as well as stimulant and invigorant, WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further demonstrated that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely solved the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, and that its use is accompanied by the greatest benefit to the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy life instead of darkness in their sheds.

Indeed, the use of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry raising, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of calves and young being used in domestic and household requirements.

WINDOLITE stands for 100 per cent sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanatoriums, hotels, plant coverings and greenhouses. It keeps out cold, rain, frost, snow and all other weather conditions and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 56 inches only. A square yard of WINDOLITE weighs about 14 lbs. and a square yard of glass of ordinary thickness, weighs 115 lbs. to 120 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, Cash, Toronto.

Mrs. Victor Myers on the 9th of Sep-
tember.

WHEAT POOL NEWS

The Alberta Wheat Pool is making
a determined effort to point out to
pool members the importance of de-
livering pool grain to pool elevators
wherever it is possible, in view of
the light crop in Alberta this year.

The pool elevator system was built
up for the purpose of giving service
and protection to the membership.

Three years ago there were 4 pool
elevators in Alberta. Today there
are 47, representing an investment
of over six million dollars of pool
farmers' money. This investment
must be protected.

Pool members should realize that
it is a matter of very great impor-
tance for the Selling Agency to have
pool wheat readily available at all
times. When pool wheat is deliv-
ered to pool elevators it is always
available to the Selling Agency.

This grain elevator system was de-
veloped because pool farmers insisted
that this course be taken. For years
the head office of the Wheat Pool
has been deluged with requests and
even demands for pool elevators.

Now it is up to the pool farmers to
show their appreciation of their own
system by delivering their wheat to
pool elevators.

The introduction of combine and
auto trucks has speeded up harvest-
ing on the Canadian prairies to a
remarkable degree. The result has
been an unprecedented flow of grain
to the elevators during a brief pe-
riod in the fall. In order to restrict
this glut as much as possible the
Alberta Wheat Pool is offering a
bonus of 2 cents a bushel for wheat
held on farms until December 2nd,
1929. Wheat producers should real-
ize it is not good business to deliver
the wheat crop in such a hurried
manner that it has a reactionary
effect on the market.

The Wheat Pool has not made a
practice of compelling pool farmers
to deliver their crop in one crop year.
For instance, some pool farmers
have carried wheat from their 1928
crop past the date of the closing of
the 1928 pool, which was July 15th,
and delivered their grain to the
1929 pool. No objections have been
made by the pool against this prac-
tice. A recent news item issued by
the Wheat Pool mentioned that ac-
tion had been taken against a few
pool members who had not delivered
their 1928 wheat to the pool. This
has been construed by some to mean
that all pool wheat should be de-
livered within the pool year. As a
matter of fact the action was taken
because the wheat had been deliv-
ered outside the pool.
